SARS-CoV-2 (COVID-19) RT-PCR/NAAT Final Clinical Result

Result	Source	Result Reported
Negative	Nasopharyngeal Swab	Feb 03 2023 17:10 PST

e

Test Methodology:

Genotyping by PCR based enrichment and next-generation sequencing or by array based evaluation of multiple molecular probes. SARS-CoV-2 assay includes the BCCDC EUA assay as well as a laboratory developed test based on the WHO methodology.

Reporting Comments:

A negative test does not preclude the possibility of SARS-CoV-2 infection since the adequacy of sample collection and/or low viral burden may result in the presence of viral nucleic acids below the analytical sensitivity of this test method.
